St. Mary of the Assumption

Increased Offertory Program

All of us are called by the Lord to be good stewards of our resources. We are also called to be grateful for His goodness and to say thank you in word and in deed.

Next week at Mass we will be inviting all parishioners to complete an offertory commitment card. We hope you will welcome this as an opportunity to continue to share the blessings God has bestowed upon you. As Christians, we are always mindful of the great sacrifice our Lord Jesus Christ made for us and our calling to follow His example and do the same.

Within the next few days, you will be receiving a mailing from Father Dillingham. Please take some time to review the information provided. We greatly appreciate all you can do to help keep St. Mary's vibrant and strong.

**In your charity, please pray for all who have gone
before us and all the deceased of
St. Mary of the Assumption.**

Did you Know?**Part 6 - Ways to Boost the Belief in the Real Presence of Jesus Christ in The Holy Eucharist**

Four of the most incredible Eucharistic miracles that have been examined by top scientists around the world, who ultimately concluded that science could not explain the miraculous phenomenon. B. Legnica, Poland

In 2013, Bishop Zbigniew Kiernikowski, of the Diocese of Legnica stated:

On 25th December, 2013, during the distribution of the Holy Communion, a consecrated host fell to the floor and then was picked up and placed in a water-filled container (vasculum). Soon after, stains of red color appeared. The former Bishop of Legnica, Stefan Cichy, set up a commission to observe the phenomenon. In February 2014, a tiny red fragment of the host was separated and put on a corporal. The Commission ordered to take samples in order to conduct the thorough tests by the relevant research institutes.

After the investigations, the Department of Forensic Medicine stated:

In the histopathological image, the fragments of tissue have been found containing the fragmented parts of the cross striated muscle. (...) The whole (...) is most similar to the heart muscle with alterations that often appear during the agony
